

ISC 2017 WiFi Policy

In order to provide the most robust wireless internet service possible, the ISC 2017 organizers have developed the following WiFi Policy. This policy is binding for all event participants.

ISC 2017 exhibitors and attendees are not allowed to operate any IEEE 802.11 wireless access point or any other equipment transmitting in the 2.4GHz or 5.2GHz frequency range in the conference and exhibition venue during ISC 2017. This also includes build-up hours.

The ISC 2017 organizers reserve the right to impose a fine on any exhibitor who violates this policy.

Attendees violating the ISC 2017 WiFi policy may be asked to leave the conference without a refund at the sole discretion of the conference organizers.

It is the organizers' goal to create a pleasant experience for all participants. This includes reliable and high-quality wireless internet access in all areas within the conference and exhibition venue. Please help us achieve this goal by not operating any equipment that will interfere with other users' connectivity.

If you have any questions, please contact us at iscnet@isc-events.com.
